

DRAFT Road Map Project System-Wide Racial Equity Essentials

This list of "essentials" are foundational, cradle-through-college system-level efforts that, if strengthened, will help our region advance racial equity and support student success. This draft list was developed and has been refined by members of the Planning Group and Community Network based on evaluation findings and feedback provided to CCER staff over time. In the next phase of the Road Map Project, our collective work will put a heightened focus on impacting these system conditions so that our students of color are well supported and able to reach their full potential. Progress, both in the short- and long-term, on these major system changes will take time but making system change is necessary if we are to attain and sustain regional improvement.

*Strong data, research and analytic capabilities across all bodies of work
