

COLLECTIVE ACTION
FOR STUDENT
SUCCESS

GOALS

BY 2020

We will increase equitable policies and practices in our education systems and dramatically improve outcomes for children and youth, from cradle through college and career; so that:

BY 2030

We will eliminate the opportunity and achievement gaps impacting students of color and low-income children in South King County and South Seattle, and 70 percent of the region's youth will earn a college degree or career credential.

VISION

We want every child and youth in South King County and South Seattle, particularly those who are low-income or of color, to thrive in their education, communities and life.

VALUES

The Road Map Project core values guide our approach to the work and help us hold ourselves accountable to children, youth and families.

EQUITY

We believe in greater access to opportunities, power and resources so that every child can reach their full potential, with a focus on populations that have historically been furthest from opportunity.

INCLUSION

We believe in creating environments that are welcoming and respectful to every child and youth, and reflect the changing demographics of our region.

SOCIAL JUSTICE

We believe in moving society and systems toward fairness, compassion and greater respect for human dignity. We address the root causes of educational inequities not just manifestations by dismantling individual, structural and institutionalized racism.

ACCOUNTABILITY

We believe that in collective impact work, assuming responsibility for the results and impacts of our action or inaction is critical in order to change system performance for the benefit of children and youth.

OPPORTUNITY

We believe in providing every child and youth access to the experiences, resources and support that allow them to flourish.

COMMUNITY

We believe in the wisdom and common ground gained through shared experience. We seek out the perspectives and voices of the many communities in our region so community aspirations guide the work.

COLLABORATION

We believe that by working together, greater outcomes will be achieved than what is possible when individuals, organizations or systems work alone. Building community trust and strong relationships, and valuing a diversity of perspectives are central to this work.

TRANSPARENCY

We believe in being open and honest about how, why and by whom decisions are made, including decisions involving policies and resources
